

HR Attrition Analytics — Executive Summary

Prepared by: Piumi Jayawardene
Date: 2026
Dataset: IBM HR Analytics (1,470 employees)

Situation

The company is experiencing a 16.1% annual attrition rate, significantly above the industry benchmark of 10–12%. This analysis identifies the primary drivers.

Key Findings

Finding	Detail	Impact
Overtime is a major driver	30.5% attrition among OT workers vs 10.4%	High
Sales dept most affected	20.6% attrition rate	High
Salary gap	Leavers earn ~\$2K/month less	Medium
Sales Reps at highest risk	39.8% attrition rate	Critical
Low satisfaction predicts exit	Score 1 = 22% attrition	Medium

Recommendations

1. Audit overtime policies — Sales team is over-stretched
2. Conduct a salary benchmarking exercise for Sales Representatives
3. Launch quarterly pulse surveys targeting satisfaction score tracking
4. Implement a retention bonus programme for high-risk roles

Estimated Impact

Reducing attrition by 5% retains ~74 employees/year. At avg replacement cost of 50% annual salary, this saves approximately \$1.3M per year in recruitment and onboarding costs.
